Startnet Disablecart
Magento 2 Module
User Guide

This module allows you to disable the shopping cart in your Magento2 store. It disables the shopping cart and checkout functionality from the site - the shopping basket, checkout pages, mini-cart and "Add To Cart" icons/buttons will not be displayed. You are given the option to include the product option swatches as well.

It is an ideal module to use if you want your store to be a catalogue only store.

Module Installation

To install the module :

Unzip the module files to the folder
MAGENTO_ROOT/app/code/Startnet

Then from the command line prompt :

php bin/magento module:enable Startnet_Disablecart

php bin/magento setup:upgrade

php bin/magento cache:flush

php bin/magento cache:clean

Now login to your Magento2 admin console.

The module should now be installed.

As this module also uses CSS, it is worth refreshing your browser cache as well.

Startnet Disablecart Usage

Once installed, to configure the module, login to the Magento2 admin and go to:
Stores -> Configuration -> Startnet -> Disable Cart.

If any changes are made to these settings, please flush the Magento Cache in the admin console (go to System -> Cache Management). Also flush your web browser cache.

Options in System Configuration for the Module

Enable - enable/disable the module

Enabling the module will disable the shopping cart functionality of the website. The shopping basket, checkout pages, mini-cart and "Add to Cart" buttons/icons will not be displayed. This will include the configurable product options swatches on the category and product pages eg. If you had a T-shirt store which had different size options, they would not be displayed.

Hide Buttons Only – selecting "No" for this option will disable the entire checkout functionality, including configurable product options ie. only product information is displayed. If you wish to display configurable product options eg. swatches, please choose "Yes" to this option.
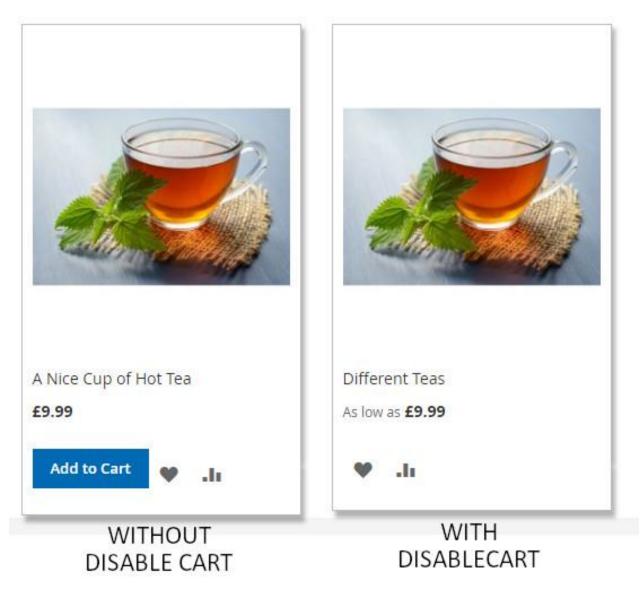

Startnet Disablecart Configuration Page

Disablecart General Configuration

If you change these settings, you may have to flush the cache to effect them.

Module Enable [store view]	Yes ▾
Hide Buttons Only [store view]	Yes ▾

Use this if you still want to display product options eg.colour swatches.

Example of the module on the frontend

A Nice Cup of Hot Tea

£9.99

Add to Cart ♥ ⅱ

WITHOUT DISABLE CART

Different Teas

As low as **£9.99**

♥ ⅱ

WITH DISABLECART

Module information :

Written by Startnet Ltd – May 2020
